

SIMETRY

**SIMETRY**

*SIMETRY, provides a single per Gigabyte (GB) or Megabyte (MB) price for cellular data connectivity with no data overages, minimums, or pooled data plans that are difficult to manage for a billing cycle. We support all major carriers across the US, as well as private carriers, to provide a single per GB/MB rate.*

*This simple, yet highly effective, pricing model removes the burden of risk from the consumer for over/under utilization of cellular data pool plans, allows you to forecast cost across all major carriers, and consolidates vendor management to a single LTE/cellular provider.*

## SEE HOW SIMETRY COMPARES TO THE COMPETITION

	TRADITIONAL CARRIER PRICING MODEL	SIMETRY PRICING MODEL
Complicated and confusing data tiers	✓	
Long term agreements	✓	
Hidden fees - Activation & Termination	✓	
Throttled speeds	✓	
Pay for what you use		✓
Monthly to month terms available		✓
One flat rate per GB/MB		✓
Consistent speed at all usage levels		✓

### TRADITIONAL LTE/CELLULAR DATA APPLICATIONS

- SCADA
- Telemetry
- Machine-to-Machine
- Tablets
- Primary Internet for Remote Field Offices
- Remote Surveillance
- Back-up/Failover Internet
- Mobile Field Assets
